

For Topaz Signature Pads

Wireless Sled™ Adapter

For T-LBK750, T-LBK755, T-LBK766, T-LBK57GC Models & SE Versions

CONNECTION AND COMMUNICATION

The Topaz Wireless Sled™ Adapter enables Topaz -BHSB-R signature pads to be used in an environment with WiFi or Bluetooth connection. Available as adapters for both existing -BHSB-R models and factory installed. The unit works with existing Topaz software and just requires a simple Topaz Network Port Driver installer on the PC to complete the connection.

Communication with the Wireless Sled Adapter is bi-directional, allowing for interactive text, graphics, and pen-tap hotspots and checkboxes, in addition to signature capture. Serving as a virtual serial device, the Wireless Sled Adapter is also compatible with remote usage (Citrix, Terminal Server, VDI environments, and ore). Data security is handled by the built-ins standard WiFi and Bluetooth protocols.

BATTERY LIFE AND HOUSING INFORMATION

The Topaz Wireless Sled Adapter uses a long-life thin Lithium Polymer battery, providing up to eight (8) hours of continuous use with a T-LBK766 or T-LBK57GC signature pad, or sixteen (16) hours of continuous use with a T-LBK750 or T-LBK755 signature pad.

The Wireless Sled Adapter is secured using the existing tablet mounting points. It comes with a protected power switch in the rear of the unit, as well as built-in power management to allow use over several days without recharging.

T-LBK755
format

Connection

WiFi-Enabled
