

iSafe Android Signature Tablet

ACTIVE STYLUS

Accurate placement of fine point during signing. Being active will cater for automatic palm rejection. Pressure can also be measured.

TRUE PORTABILITY

A tablet with built in wifi and rechargeable batteries. The tablet can be signed anywhere without the hindrance of wires.

TOPAZ PDOC SIGNER

Built in leading Topaz PDF signing software which is essential in producing legal binding document.

FRIENDLY VIEWABILITY

With 10.1 inch IPS viewing screen, the signer is able to view the whole document before he or she signs.

INTEROPERABILITY

Being on android platform allows developer to easily integrate third party applications with pDoc Signer.

Introduction

The iSafe Android Signature Tablet is designed for applications where the requirement is to be able to read complete documents before signing them and to have complete mobility. You can comfortably scroll through the document by using the active stylus. You can start the downward (or upward) document sliding only by brushing the screen with the pen tip. This motion will start the screen scrolling. It is the ideal solution for banks, government agencies as well as for companies where complex documents must be read before signing.

Highlights

With active stylus, iSafe Android Signature Tablet is able to mimic as close as manual signing experience on the electronic platform. The tablet comes with bluetooth, wifi, rechargeable battery and camera to assist in making signing experience to be seamless and yet binding.

With the full screen, signing with full visibility of document offers intuitive signing environment to the signer.

With android, third party application can be built to complement the signing ecosystem.

Topaz pDoc Signer Options

The iSafe Android Signature Tablet is integrated with Topaz pDoc Signer. It comes in 2 models: pDoc Signer and pDoc Signer Client. pDoc Signer allows signing of electronic signature in PDF document locally while pDoc Signer Client allows PDF document to be pushed from a server. For more information on the pDoc Signer Client, please refer to the following link:
