

iSafe Bio Attendance Tablet

BIOMETRIC AUTHENTICATION

Our system uses fingerprint recognition, face recognition and iris recognition technologies to improve the speed and accuracy of attendance events.

TRUE PORTABILITY

A tablet with built in wifi and rechargeable batteries. It can record attendance anywhere without the hindrance of wires.

EMPLOYEE MANAGEMENT

Employee management provides employee details management, biometric enrollment, manual authentication data management.

ACCURATE RECOGNITION

With 10.1 inch IPS viewing screen, it facilitates more accurate facial recognition of the attendee.

Multimodel Biometrics

The iSafe Bio Attendance uses fingerprint recognition, face recognition and iris recognition technologies to improve the speed and accuracy of attendance events.

For Face Contact-less Biometric attendance - Users do not need to touch anywhere to capture the face. System automatically detects, capture and recognize the employees and record the clock in and clock out events.

Environments like hospitals, factories and laboratories that having health risks from bacteria, chemicals or poisonous material cannot use fingerprint mode safely.

A screenshot of the iSafe Bio Attendance software interface. It shows a navigation menu with options like Dashboard, Users, User Groups, Shifts, Attendance, Reports, Client devices, and Settings. Below the menu, there are filters for 'Type' (User), 'User group', and 'Shift'. A 'Calculate by' section allows users to select 'Daily', 'Weekly', or 'Monthly' reports. A table displays attendance data for various employees, including columns for Name, Employee Code, Start Date, End Date, Worked Hours, Worked Hours (DEC), Overtime Hours, and Overtime Hours (D).

GROUP	NAME	EMPLOYEE CODE	START DATE	END DATE	WORKED HOURS	WORKED HOURS (DEC)	OVERTIME HOURS	OVERTIME HOURS (D)
1/1/2017	William Bryant	1/1/2017	2/1/2017	00:00:00	0.13	00:00:00	0	
	Liam Cameron	1/1/2017	2/1/2017	00:00:00	0	00:00:00	0

	Billy Moss	2/1/2017	3/1/2017	10:15:29	10.25	10:15:25	10.25	

Introduction

Enroll all employee biometric data into iSafe Bio Attendance. It automatically collects employee biometric and perform employee biometric validation in all clock-in and clock out events. Only administrator can make manual correction to time attendance records via biometric attendance system control panel. System also keeps the attendance audit records for time attendance record changes.

Dynamic Reporting

Configurable dynamic attendance report generation allows users to customize their reports with desirable data and time ranges. Fully detailed timesheets can be generated for any time range given. Daily, weekly and monthly timesheets can be used for different kinds of employees that have different payment cycles. Reports also include location information if the clock-in device supports GPS. All generated reports can be exported to various file formats including excel, csv, pdf.
