

Fluidfax

Faxing efficiency without the cost

Fluidfax reduces the costs of faxing by enabling users to send and receive faxes directly from their desktop. With the convenience of not having to leave their desks or stand in line at the fax machine, tremendous amount of time is saved every day. By treating faxes as electronic documents, Fluidfax eliminates the need to pay for the supplies of paper and toners of traditional fax machines

Key benefits

Boosts productivity

Desktop faxing means no more standing in line at the fax machine every day, saving tremendous amount of time.

Reduces recurring costs

Send and receive faxes as paperless documents eliminates the recurring costs for paper, toner and maintenance when using fax machines.

Simplifies management

Consolidate separate fax lines with fewer shared lines with Fluidfax at one central location. This reduces the number of telephone lines and the effort to maintain each individual fax machine thereby further reducing costs.

Improves confidentiality, security and compliance

Organizations can track and control who sends and receives faxes. This improves confidentiality, security and compliance (HIPAA, Sarbanes-Oxley etc.). All sent and received faxes are archived electronically.

Easy to install and manage

Fluidfax can be set up and managed very easily without extensive computer background or certifications.

Great value for money

The licensing is designed to offer enterprise faxing capabilities at a small business price. All businesses stand to benefit from using Fluidfax.

Improves business processes

Automate the faxing of critical business documents such as purchase orders and invoices from your financial, ERP, CRM, ECM and Document Management systems. Fluidfax integrates easily with these systems further improving business processes.

Core features

Flexible sending and receiving

Users can conveniently send, receive and manage faxes from desktop computers and mobile devices. Faxes can be sent and received as emails.

Automatic inbound fax routing

Received faxes can be automatically route to users' mailbox, file folders or network printers based on the following attributes:

- Channel / line of the received fax.
- Sender's fax machine ID.
- Sender's caller ID.
- Called number using DID or DTMF.

Security and scalability

Fluidfax supports up to 120 analog and digital fax channels / lines per fax server and unlimited users.

System requirements

- Microsoft Windows XP, Vista, 7, 8 and Windows server 2003, 2008, 2012.
- CPU: 1GHz processor
- 512MB RAM
- 100MB hard disk space
- Fax modems or Dialogic Diva fax boards

Web based

Fluidfax is fully web based for both users and administrators. Users send faxes through a simple web interface without the need of a fax client.

Fax broadcast

Organizations can broadcast their marketing and event notification messages by sending one fax to hundreds or thousands of recipients at once.

Applications integration

You can easily integrate faxing directly from your production applications with Fluidfax through multiple ways such as by email API or by dropping documents into a fax pickup folder.

Supports low cost operating systems

Fluidfax can be installed on lower-cost operating systems such as Windows® 7 and 8 as well as the Microsoft® server operating systems.

Fluidfax appliance

Fluidfax is available as an appliance with the fax hardware and software preinstalled and configured. Fluidfax appliance arrives ready to be plugged into your office network and it can start working immediately with minimal configuration.
